Quality Policy

POL-DCS-QLY-001

Effective Date: 1/1/14

Reviewed:

**Through Leadership and Commitment it is the aim of DCS's Senior Management to provide a standard of quality in the provision of our service through the development, implementation and continuous improvement of our management systems and policies, supported by appropriate organisational structures, positive behavior of individual managers and the promotion of a cooperative effort at each level of the DCS organisation.**

Documented Quality management systems and policies are used as tools for the overall planning and administration of activities which impact on the quality of the organisation.

Effective Quality management within DCS is managed through the commitment of the Managing Director and Senior Management in the belief that the application of an effective management system contributes to the overall business performance.

DCS aims to preserve and develop human and physical resources, and develop an organisational culture that supports the empowerment and participation of the workforce, and reduce costs and liabilities by means of effective and efficient identification of hazards and implementation of risk reducing measures.

David W. Sturrock

Managing Director

DCS Pty Ltd.
